Title: STACKED CAPACITOR HAVING PARALLEL INTERDIGITIZED
STRUCTURE FOR USE IN THIN FILM TRANSISTOR LIQUID
CRYSTAL DISPLAY

To: Commissioner for Patents
P.O. BOX 1450

Subject: Information disclosure statement under 37 CFR §1.56

Dear Sir or Madame:

This is an Information Disclosure Statement in accordance with the duty to disclose information material to patentability under 37 CFR §1.56. The applicant wishes to make of record the document(s) listed on the accompanying form PTO/SB/08.

Since this IDS is filed before the mailing date of a first Office action after the filing of a request for continued examination under §1.114, consideration of the information disclosure statement is hereby requested according to 37 CFR §1.97(b)(4). That each item of information contained in the information disclosure statement was first cited in an Office communication mailed on 04/28/2006 for the counterpart Chinese application number 03147450.0, which are no more than three months prior to the filing of the information disclosure

statement.

The abstract of the application (JP H09-162412) is hereby presented to fulfill the information disclosure statement requirement set forth in 37 C.F.R. §1.98 and M.P.E.P. 609. The English language abstract of the application (JP H09-162412) is listed as follows:

PROBLEM TO BE SOLVED: To display a high quality image by increasing a pixel opening ratio and also reducing the resistance of capacitance line, and further reducing cross-talk and ghost in an electro-optical device.

SOLUTION: The electro-optical device is provided with pixel electrodes (9a), TFTs (30) for controlling to switch the pixel electrodes, scanning lines (3a) connected with these TFTs, and 2nd capacitance lines (3b) for adding storage capacitance (70) on a TFT array substrate (10). The device is further provided with a barrier layer (80) for relay-connecting the pixel electrodes to the TFTs and 1st capacitance lines (82).

The abstract of the application (JP 2001-265253) is hereby presented to fulfill the information disclosure statement requirement set forth in 37 C.F.R. §1.98 and M.P.E.P. 609. The English language abstract of the application (JP 2001-265253) is listed as follows:

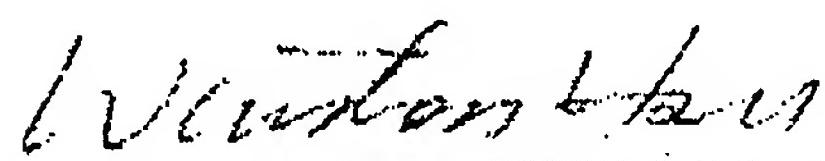

PROBLEM TO BE SOLVED: To provide a thin film transistor, used for an active matrix liquid crystal panel, in which leakage current is reduced, and a thin film transistor array which is provided with the thin film transistor and forms a large storage capacity with a small area.

SOLUTION: An active layer 207 is put between the first gate electrode 203 and the second gate electrode 209, and an off-set area 206 is overlapped with the third gate electrode 202 and the fourth gate electrode 211, so that high on-current and low leakage current are realized at the same time. The storage capacities suppressing dropping of electric potential of a pixel are formed between a transparent pixel electrode 223 and the third electrode 22 for storage capacity, the third electrode 222 for storage capacity and the second electrode 221 for storage capacity, and between the second electrode 221 for storage capacity and the first electrode 220 for storage capacity, so that, a large storage capacity is formed with small areas.

It is respectfully requested that the examiner can consider the document(s) listed on the accompanying form PTO/SB/08 and that it be made of record in the application.

The applicants sincerely hope that the examiner initials the cited reference(s) on the form and that a copy of the initialed form be sent to the applicants with the next communication from the examiner.

Respectfully submitted,

Date: JUL 17 2006
